

MAKING A BEAUTIFUL & LASTING
IMPRESSION ON YOUR PROPERTY

A custom driveway from Driveway Impressions is an affordable way to bring new beauty & value!

With Driveway Impressions' proprietary StreetPrint imprinted asphalt technology you can enjoy the effect of real brick or stone, for less money than you might think. Consider the additional advantages of imprinted asphalt over real brick, stone, stamped concrete or pavers, and you'll find a more beautiful surface – that will stay beautiful longer – at a far lower cost!

Lasting Beauty ...

Driveway Impressions offers StreetPrint in a broad range of patterns, colors and custom configurations you can use to turn one of the single largest features of your property into a decorative gem. As you can see from the 'before and after' simulations in this brochure, StreetPrint presents an authentic representation of natural brick in a variety of colors. Depending on the style and color of your home, you may prefer StreetPrint slate or cobblestone patterns, each providing the same realistic appearance.

Your Driveway Impressions decorative driveway starts out beautiful – & stays beautiful!

StreetPrint imprinted asphalt, with its unique poly/cement surfacing system has additional advantages over other paving technologies, including real brick or stone, stamped concrete, etc. Because the StreetPrint pattern is formed from a single continuous layer of asphalt substrate, it resists penetration by water (which, with recurring freeze/thaw cycles, can cause surface damage to other paving technologies). This same feature virtually eliminates potential damage from plant growth and insect activity. StreetPrint's poly/cement surface compound resists staining and damage from salt, oil, chemicals and petrochemicals—materials that can ruin brick, stone, concrete or untreated asphalt. And finally, should your StreetPrint decorative driveway become damaged, even many years down the road, it can be repaired and resurfaced seamlessly, returning the driveway to 'like-new' condition in as little as a single day! Driveway Impressions' StreetPrint technology truly is a better, more cost-effective solution in both the short and long terms.

 Taupe	 San Diego Buff	 Fawn	 Driftwood
 Truffle	 Concrete Grey	 Irish Cream	 Sandstone

Driveway Impressions' StreetPrint – better technology means better overall value!

Durability ...

The inherent properties of StreetPrint's imprinted asphalt substrate and proprietary poly/cement surfacing technology makes it a superior choice for durability as well as beauty. The continuous, flexible surface of the asphalt substrate resists cracking and lifting, a frequent problem with real brick, concrete pavers and stamped concrete. With other more rigid paving technologies, water penetration (through seams or expansion joints, in the case of stamped concrete), followed by subsequent freeze/thaw cycles, can cause extensive damage.

Insects and plant growth can also penetrate these surfaces and further degrade their appearance and structural integrity. In warmer climates, where continuous exposure to sunlight may cause color fade (an irreparable problem for stamped concrete), StreetPrint's poly/cement surfacing system once again provides greater resilience. And finally, StreetPrint can be cost-effectively resurfaced and returned to 'like-new' condition – years after it's original installation – a trick no other paving technology can match! Simply stated, your Driveway Impressions decorative driveway starts out beautiful and stays beautiful longer!

Professional, courteous applicators you can trust ...

The quality of your overall experience with Driveway Impressions is as important to us as the quality of our final product. Let's face it, everyone has suffered the experience of an unreliable ... OK, just plain scary ... contractor from time to time. (Sure, there are plenty of great contractors, but you know the ones we're talking about.) Every Driveway Impressions applicator is selected, and specifically trained, to provide more than expert installation – our applicators must exhibit the ability and the desire to deliver the professional, personal, courteous service you deserve. And, you'll get that level of service ... every time ... guaranteed!

Phenomenal Value!

If you've always wanted the look of real brick or stone, but were afraid the cost would make it prohibitive ... you were right ... until now. A StreetPrint driveway from Driveway Impressions could save you thousands! No other technology can provide such a dramatic, authentic appearance as cost-effectively.
